

- **Bio-Zyme** contains live microorganisms which have been genetically engineered to eliminate odors and liquify waste.
- The variety of bacterial strains in the **Bio-Zyme** formula grow in either the presence or absence of air. (Aerobic/Anaerobic)
- Each batch includes patented bacteria:
  - Grease and oil digesters
  - Paper digesters
  - Detergent digesters
  - Odor controllers
- **Bio-Zyme** is non-corrosive, non-acid, non-alkaline and non-polluting. Excellent for use in drains, traps, septic tanks, restrooms, urinals, on carpets and upholstery and as a laundry prespotter. Prevents the build-up of grease and fat.
- Can be used as supplied.
- Labor saving – Cost effective.

### DESCRIPTION

A live bacteria emulsion which attacks grease, fats, proteins and carbohydrates. Breaks down uric acid molecules quickly while digesting the source of odors with no environmental impact. Liquifies and cleans organic waste, paper, grease, fat and other wastes from drains, pipes and grease traps. Restores normal biological activity to septic tanks and sewage treatment plants. Also effective as a cleaner and odor control for carpets and as a laundry spotter.

### DIRECTIONS

**Restrooms and Urinals:** Mix product with 1 to 2 parts warm water. Spray, mop or wipe onto surface to be cleaned. Agitate, if necessary. Reapply mixture and allow surface to remain moist for at least 15 minutes.

**Uric Acid Odor Neutralizer:** Preclean organic matter (vomit, feces, etc.) from soiled surfaces. Spray or mop around urinals, toilets, floors, walls or carpets where odors originate.

**Sinks/Wash Basins/Shower Stalls/Bathtubs:** Add 4 oz twice weekly to drains. Vary amount and frequency according to usage and size of drain.

**Garbage Disposals:** Add 2 oz weekly for digestion and deodorizing.

**Drains, Traps and Septic Tanks: For initial treatment: 1 qt (32 oz).** Add product to opening closest to trap prior to its longest non-use period. (Large traps may require additional amounts.) Pour 4 to 8 ounces directly into floor or sink drains, twice per week. For grease traps, 20 cubic feet capacity, pour 8 ounces into drain daily. Time application for when drains are least used. For septic tanks, use 16 ounces for initial treatment then 8 ounces per week thereafter.

**Tile Field:** After tank has been treated, add 1 gal directly to distribution box. Repeated treatment may be required.

**Lagoons:** Add 1 qt for each 10,000 gal capacity. This can vary depending on feeding equipment used and condition of lagoon.

**Recreational Vehicles & Marine Holding Tanks:** Add 3 oz per gal of liquid to holding tank.

**Porta-Toilets & Outhouses:** Add 1 qt to solids to deodorize and aid in digestion.

**Laundry Prespotter:** Apply full strength to soiled areas prior to washing.

**Carpets and Upholstery:** For normal stains and odors, mix 1 part product with 2 parts warm water. For severe stains and odors, mix 1 part product with 1 part warm water. Spray, mop or wipe onto surface to be cleaned. Agitation may be necessary to remove severe stains. For deep penetration of carpets and upholstery, apply with hypodermic type injector/appliator.

**Note:** Remember to test carpet and fabric for colorfastness. Surface must remain moist for product to work properly. Use any mixed solution within 12 hours or it will become ineffective. Do not subject product to extremely hot or boiling water, disinfectants or chlorinated dishwashing products.

**Precaucion al Consumidor:** Si usted no lee Ingles, no use este producto hasta que la etiqueta le haya sido explicada ampliamente.

**To the User:** If you cannot read English, do not use this product until the label has been fully explained to you.

### CAUTION: MAY BE HARMFUL IF SWALLOWED KEEP OUT OF REACH OF CHILDREN

**Contains:** Water (CAS# 7732-18-5), Micro Organism Suspension (non-pathogenic)(CAS# Not Est.), Colorants and Odorants (CAS# Not Est.).

**Effects of Over Exposure:** May cause eye irritation. May be harmful if swallowed.

### EMERGENCY AND FIRST AID PROCEDURES

**For Skin:** Not considered a hazardous route of exposure.

**For Eyes:** Flush with water for at least 15 minutes. Get medical aid.

**If Ingested:** Give one or two glasses of water. Get medical aid.

### TECHNICAL DATA

Color.....	Opaque White	pH @25 °C .....	6.0-7.0
Odor .....	Eucalyptus Scented	Nonvolatile Solids .....	1.0%
Toxicity .....	Non-Toxic	Viscosity @25 °C.....	Free Flowing
Activity .....	Fats, Grease, Carbohydrates, Protein	Specific Gravity @20 °C .....	0.999
Bacterial Count .....	200 Billion/Gal. Min.	Weight Per Gallon @20 °C.....	8.32 lbs
		Shelf Life.....	12 Months
